

Analysis of Mobility Platform (AMP)

SYSTEM DESCRIPTION

Analysis of Mobility Platform (AMP) provides access to the Joint Operation Planning and Execution System (JOPES) database to obtain data for use by an integrated set of automated tools. These tools provide an interactive modeling environment to develop or edit deployment plans for specific scenarios. Using the tools operators analyze transportation plan scenarios with a variety of models to project and identify bottlenecks.

INTEROPERABILITY CERTIFICATION STATUS

Please refer to the [Joint GCCS Interoperability Status Table](#)
